PERMA CYL

230 to 1000 Liters

Chart's Fill-At-Site-Technology ...FAST... for Stationary Applications

The Perma-Cyl 230 is available with casters or round base.

Introducing the Perma-Cyl

- ▶ Low Cost Packaged Gas
- ▶ Fast No-Loss Fill Capability
- ▶ Extended Holding Time
- ▶ Easy To Adjust Pressure Control
- ▶ European Ready...PED Coded

The FAST solution features...

For most users of 10 or more cylinders per month, Perma-Cyls offer a lower cost alternative than individual cylinders or bundles. Delivering liquefied gas at site costs less than transporting a lot of steel and some compressed gas.

Perma-Cyls can be filled in 3 minutes (Perma-Cyl 230) with no losses using the Orca delivery system under normal conditions. And the unique Chart auto shut-off allows the option of remote filling without entering the user's building.

Improved thermo-technology has lowered normal evaporation, extended holding times without venting (up to 6 days at normal gas-use pressure) and reduced pressure rise...all to improve customer satisfaction.

Chart's combination regulators allow easy pressure adjustment using a built-in pressure scale.

Three Convenient Sizes Popular Options

- | | |
|------------------------|-------------------------|
| ▶ 230 Liters - 22 bar | ▶ Remote filling |
| ▶ 600 Liters - 24 bar | ▶ Top and bottom fill |
| ▶ 1000 Liters - 24 bar | ▶ Safety device options |

5-year vacuum warranty
